

At CLEAR Eye Care, we know you want to feel confident about your eyesight and the way you present yourself to the world. In order to do that, you need an exceptional eye care experience.

The problem is, there's often something missing in the service and care we receive, which leaves us feeling uncertain when we walk out the door. Let's be clear. You deserve more than just a prescription and frames.

We know what it's like to feel that something's missing, which is why we set out to create a better patient experience for eye care. For 13 years, we've served Texas residents with a full spectrum of eye care services from routine exams to surgical consultations. We focus on hospitality and making sure you have a place to visit where you feel welcomed and valued. Our optometrists perform in-depth exams that provide far more assurance than just a prescription, and our Personal Opticians provide concierge-level service as you search for the right frames.

Here's how it works.

1. **Be Our Guest** – You'll receive a warm welcome with your choice of beer, wine, espresso, or other beverages.
2. **Receive Exceptional Care** – We use the latest technology to screen your eyes for potential threats, and we take the time needed to carefully address your concerns.
3. **Find the Perfect Fit** – You'll have access to truly unique, exclusive eyewear, and we'll make sure you find a custom product and fit that you can't wait to show off.

When you become a patient at CLEAR, you also become part of something bigger. Our mission is *Clear Vision for All*, and part of your purchase supports our *Seeing Good* program which provides eye care and frames for people in need. We're also creating greater accessibility to care through our *Mobile Eye Care Program*, and we're giving patients a way to gain more value and flexibility from their insurance policies.

So, reserve your appointment today. And in the meantime, you can download our free resource, "*5 Threats to Your Eyesight at Any Age*"

You can avoid an impersonal eye care experience that fails to address your full medical needs and instead look forward to an appointment where you get to **experience great care, feel great about the way you look, and help others do the same.**
